DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claims 1-5 are rejected under 35 U.S.C. 102(e) as being anticipated by Pelhos et al. (US 2004/0115481.

Pelhos et al. disclose a magnetic recording disk having multiple seed layers disposed on a substrate wherein at least one of the seed layers has grains wherein the crystallographic texture is tilted with respect to a line normal to the substrate surface. The seed layers are formed by an oblique deposition technique (see paragraphs 11, 30, 63). The reference teaches that multiple crystalline layers are deposited on the seedlayer including a magnetic recording layer and a protective overcoat.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 1773

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

4. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Pelhos et al. (US 2004/0115481) in view of Fujimaki et al. (US 2003/0228496).

Pelhos et al. teach all of the limitations of the claims as detailed above, except for the limitations directed to features of the magnetic recording device including the use of an actuator for moving the magnetic head with respect to the recording medium.

Fujimaki et al. teach that it is known in the art that a magnetic recording device includes a recording medium in combination with a magnetic head and an actuator arm for moving the head with respect to the medium.

Allowable Subject Matter

5. Claim 6 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The closest prior art to Pelhos et al. fail to teach or suggest the use of a seedlayer containing Al and Ru. The prior art fails to teach or suggest a motivation to substitute the claimed material for the seedlayer materials taught by Pelhos et al.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Tanahashi et al. (J Magn Mag Matl, Vol 153, No. 3, 1996, pp 265-272) is cited as art of interest.

Art Unit: 1773

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Holly Rickman whose telephone number is (571) 272-1514. The examiner can normally be reached on Monday-Friday 9:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Deborah Jones can be reached on (571) 272-1535. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
